### Special Issue Introduction

Stroke is the fourth leading cause of death and the leading cause of disability in the United States. As both a common and devastating disease process, efforts focused on improving our understanding and treatment of cerebrovascular diseases are urgently needed. We are hereby soliciting manuscripts for this special issue dedicated to basic cerebrovascular biology as well as clinical and translational research focused on the diagnosis and treatment of cerebrovascular diseases including ischemic stroke, hemorrhagic stroke. Articles addressing acute ischemic intervention, stroke rehabilitation, cerebral aneurysms, cerebral vascular malformations, Moyamoya disease and extracranial and intracranial atherosclerotic disease are especially encouraged.

### Benefits

**Open Access:** The full-text of each published article can be accessed and downloaded from the journal website without any fee. The copyright is owned by all authors.

**Free of Charge:** We provide free services to authors for manuscripts' processing, publication, and reproduction of photographs.

**Rigorous Peer Review:** We strictly follow international guidelines (COPE Ethical Guidelines for Peer Reviewers) and ensure rigorous peer review process.

**Wide Promotion:** The full text of each published article is promoted and widely disseminated across the internet, conferences and academic social media.
